

Stretch Film Products

Get the Right Film.

Get the Dependable Film.

Choose Unisource Stretch Film.

One of the best ways to achieve efficiency in your packaging operation is to use the right stretch film. It's no stretch for you to choose the right film for your application – if you choose high performance films with the Unisource name. Do you have standard loads or irregular load profiles? Bulky, heavy or both? Are pallet loads wrapped for interplant transfer or shipment around the world? We make sure our stretch film delivers the reliability and value required by today's packaging operations.

Freedom Ultra Thin Stretch Film

Unisource's new Freedom Ultra Thin Stretch Film unites superior strength with lightweight material to deliver a remarkable product with maximum performance and minimal heft.

Converted Film Product Features & Benefits

Ultra Thin Stretch Film

Freedom

- >> Biaxially Oriented Film to provide strength in both directions
- >> Folded edges to eliminate film breaks caused by nicked edges
- >> Engineered to deliver high load containment with minimal user effort
- >> Aggressive cling to minimize film tails
- >> Lightweight rolls reduce fatigue
- >> Engineered wind tension to avoid film damage when roll gets dropped
- >> Ideal for cold, freezer & dusty applications
- >> Walk forward, safer to apply
- >> Higher yield, fewer wraps

Color & Specialty Film Products

The Unisource family of Color and Specialty Films offers an array of Stretch Film options—from gauge and color selections to solutions for complex wrapping and light-sensitive applications—to assure that your specific wrapping need is covered.
